PROJECTS   https://github.com/chrisRV15

Address Book
Creator | 2022
Built a contact book where the user can store first and last name, street, city, state, and email. The user can create, delete, update, and search in the book.
Used JavaFX, Java, and Visual Studio Code in the creation.
Designed an intuitive user interface for easy navigation and data entry.

Web Site
Creator | 2023 | https://chrisrv15.github.io/Website-Project/PetGallery
Created a responsive web application for users to upload and display pet photos.
Implemented client-sided data storage using local storage for a seamless user experience.
Utilized Bootstrap to ensure cross-device compatibility and modern design principles.

Endless Runner (Run to the Temple)
Creator | 2020

Designed and developed a 2D endless runner game with randomly generated obstacles.
Created custom pixel art assets using Aseprite to give the game a unique visual style
