Decision Making

PROJECTS | <https://chrisrv15.github.io/PortfolioPage/> | <https://github.com/chrisRV15>

Address Book

Creator | 2022

Built a contact book where the user can store first and last name, street, city, state, and email. The user can create, delete, update, and search in the book.

Used JavaFX, Java, and Visual Studio Code in the creation.

Designed an intuitive user interface for easy navigation and data entry.

Web Site

Creator | 2023 | <https://chrisrv15.github.io/Website-Project/PetGallery>

Created a responsive web application for users to upload and display pet photos.

Implemented client-sided data storage using local storage for a seamless user experience.

Utilized Bootstrap to ensure cross-device compatibility and modern design principles.

Todo List Application

Creator | 2024

Developed a dynamic Todo List app using React and JavaScript/JSX.

Implemented core functionalities such as adding, checking off, and deleting tasks.

Utilized local Storage to ensure task persistence across page reloads or browser sessions.

Focused on clean, modular code and a responsive user interface.
